**10TH ANNUAL
LIMOUSIN & LIM-FLEX
BULL SALE**

**HAGER H&C CATTLE
COMPANY**

HAGER HCC CATTLE COMPANY

From our family to yours, we cordially invite you to the 10th Annual Hager Cattle Company Bull Sale to be held March 28 at 5:00 p.m. (CST) at Kist Livestock.

The 2016 People's Choice Champion Lim-Flex Pen of Bulls from the National Western Stock Show will highlight our sale. In addition, we will sell 10 direct sons of one of our premiere donor cows, AHCC Dakota Luvly R594, sired by LSF Saga, AHCC Red Xplosion, and Mags Y-Axis.

This year we have continued to see volatility in the beef cattle market, however it is still the second best cattle market of all time. During times of volatility it is extra important to select proven, breed-leading seedstock. The need for moderate birth, high growth, performance-oriented cattle with the ability to grade has never been greater.

At HCC we feel extremely excited about this set of bulls with their breed-leading EPD profiles for growth and marbling. We have tirelessly bred these cattle to be able to perform and grade in today's mainstream markets. Many of the bulls offered rank in the upper 30% or better for these traits of economic relevance.

We have bulls that fit the needs of the most astute cattlemen. Our offering includes purebreds, high percentage, and Lim-Flex bulls. You will also find bulls that offer calving ease, growth, performance, yield grade, and quality grade. Perhaps, most importantly, these bulls will sire calves that have the ability to top the market.

Our primary focus is to serve the needs of commercial cattlemen. We started out in the commercial cattle business ourselves and that is still a major portion of our ranching operation. We understand the needs of ranchers and strive to produce cattle that have moderate birth weights, explosive

growth, fleshing ability, rib shape, marbling, and maintain the muscle and yield Limousin cattle are known for. As we continue to make genetic progression in our herd, we feel this is the best set of bulls from top to bottom that we have ever produced.

The bulls have been semen tested, ultrasound scanned, and sell with complete performance records and EPDs. Bulls sell with a first breeding season guarantee. Volume buyers are crucial to our sales success and we continue to offer volume buyer discounts. We also offer free delivery within North Dakota and adjoining states. Or bring your trailer sale day and receive a \$75 per head discount if the bulls are hauled home on sale day.

Videos of all the bulls are available on our website, www.HagerCattleCompany.com. You are also welcome to stop by the ranch anytime to view them in person until March 24. Beginning Saturday, March 26, the bulls will be in the yards at Kist Livestock for your appraisal. For more information contact the ranch or any affiliated sale staff listed in the catalog.

Thank you for your interest in our program. We look forward to seeing you on March 28th.

Sincerely,
Austin and Leah Hager Family
Hager Cattle Company

**Watch the sale and register to bid online
at www.DVAuction.com**

Absentee bidders who wish to utilize the Internet may bid online at www.DVAuction.com. Please register online at least 24 hours prior to the sale. Call 402-316-5460 for customer service/bidder approval.

We do not wish to clutter your mailbox and if you would rather not receive further mailings from Hager Cattle Company, please email your name and address to hagercc@srt.com to be removed from our mailing list.

HAGER CATTLE COMPANY

10th Annual Limousin & Lim-Flex Bull Sale

Our bulls can be found in leading commercial herds. We're proud of our reputation for producing bulls that have the balance of traits to work in every segment of the beef industry.

TIME AND LOCATION:

Monday, March 28, 2016 • 5:00 p.m. CST
Kist Livestock • Mandan, North Dakota

SALE-DAY PHONES:

Austin Hager (701) 626-2345
Kist Livestock..... (800) 732-1163

SPECIAL GUESTS:

Kirby Goettsch, Farm & Ranch Guide (605) 380-3939
Kris Peterson, Cattle Business Weekly (701) 339-0305
Vern Frey - Frey Livestock
Sales & Service, Inc..... (701) 721-0344
Andy Rest, NALF Regional Manager (406) 670-5678
Mark Anderson, NALF Executive Director (970) 590-9576

AUCTIONEER:

Chisum Peterson..... (605) 730-4214

ACCOMMODATIONS:

A block of rooms is available at the Kelly Inn, 1800 N 12th St., Bismarck, ND 58501, (701) 223-8001. The block is under Hager Cattle Company and available until March 16.

Food and refreshments will be served at the sale.

ADDITIONAL INFORMATION:

Videos, yearling weights, scrotal measurements and ultrasound data will be available March 15. If you wish to purchase livestock insurance on your bulls or to purchase semen from HCC sires, please contact Mark Smith of Grassroots Genetics and Consulting, (515) 229-5227.

TERMS:

Terms of the sale are cash unless prior credit arrangements are made between buyer and seller. Settlements are to be made immediately after the conclusion of the auction. Terms and conditions of NALF.

HEALTH:

Inforce 3, Calf Guard, Bovi-Shield Gold, 7-way, Sommus, Dectomax Injectable, Ivermectin

GUARANTEE:

All bulls are semen tested and guaranteed to be breeders. Scrotal measurements will be available March 15.

LIABILITY:

Each animal will be the buyer's risk as soon as sold, but will be cared for by the seller for a reasonable period of time. Every precaution will be taken for the welfare of the cattle sold. Neither owner nor sales management can be responsible for accidents, but every effort will be made to provide for the safety and comfort of those attending the sale.

TRANSPORTATION:

Free delivery in North Dakota and surrounding states. Delivery beyond will be done in the most cost efficient manner possible.

ANNOUNCEMENTS:

Announcements made sale day will take precedence over printed material in catalog.

ABSENTEE BIDS:

Mailed or telephone bids will be handled in the most confidential manner. If you are unable to be present to place your bids, please feel free to contact Hager Cattle Company.

VOLUME PURCHASES:

3% discount on 3 head of bulls.
Up to 10% discount on 10 head of bulls or more.

\$75 credit per bull if buyer hauls home sale day.

Cow-Calf Producers - Add Value with Limousin

“Limousin cross cattle give me more pounds to sell while combining quality grade and carcass yield. I highly recommend using Limousin cattle in any program as they add profitability to all segments of production.”

-Fred Wacker, Miles City, Montana rancher and cattle feeder

“Limousin and Lim-Flex bulls have added pounds to my calves at sale time. They have topped the market year after year and sell to the same buyer. They work for him.”

-Galen Peterson, Kansas rancher and cow-calf producer

Using Limousin & Lim-Flex® EPDs to Make Genetic Improvement

The North American Limousin Foundation (NALF) uses all available information to predict an animal's EPD. This information includes: individual performance, pedigree, progeny and grand progeny performance, and genomic information. All this information is combined into one, easy to use, number that helps producers make genetic improvement in their herd.

Since the spring of 2015, NALF joined 11 other U.S. and Canadian breed associations to form the largest international multi-breed cattle evaluation in the world through International Genetic Solutions (IGS). This allows growth and carcass EPDs for Limousin and Lim-Flex® (Limousin x Angus hybrid) animals to be directly compared with Red Angus, Simmental, Gelbvieh, Shorthorn, Maine Anjou, and Chianina animals (and all their hybrid animals). This makes selection decisions easier for commercial producers.

Listed below are the definitions for Limousin and Lim-Flex EPDs and the units in which they are published. For more information visit www.NALF.org or call 303-220-1693.

Maternal and Growth Traits

Calving ease direct (CED): Percent of unassisted births of a bull's calves when he is used on heifers. A higher number is favorable, meaning better calving ease.

Birth weight (BW): Predicts the difference, in pounds, for birth weight of the calf.

Weaning weight (WW): Predicts the difference, in pounds, for weaning weight (adjusted to age of dam and a standard 205 days of age). This is an indicator of growth from birth to weaning.

Yearling weight (YW): Predicts the expected difference, in pounds, for yearling weight (adjusted to a standard 365 days of age). This is an indicator of growth from birth to yearling.

Milk (MK): The genetic ability of a sire's daughters to produce milk expressed in pounds of weaning weight.

Total maternal (TM): An index that combines growth and milk information as a prediction of the weaning weight performance of calves from a sire's daughters. A greater TM value means a mother that returns comparatively higher weaning weights on her calves. TM Index = MK EPD + ½ WW EPD.

Calving ease maternal (CEM): Represented as percent of unassisted births in a sire's first-calving daughters. A higher number represents more favorable calving ease.

Scrotal circumference (SC): Is a good indicator of age at puberty, and is a highly heritable trait. EPDs for scrotal circumference are expressed in centimeters, with higher values indicating genes for larger yearling scrotal circumferences of sons and earlier puberty of daughters.

Stayability (ST): Predicts the genetic difference, in terms of percent probability, that a bull's daughters will stay productive within a herd to at least six year of age. The stayability EPD is one of the best measures currently available to compare a bull's ability to produce females with reproductive longevity.

Docity (Doc): Predicts genetic differences in the probability that offspring are scored a 1 (docile) or 2 (restless) as opposed to 3, 4, 5 or 6 (nervous to very aggressive). Higher EPD values for docility represent genetics for calmer behavior.

Carcass Traits

Yield grade (YG): Differences in yield grade score, which is a predictor of percent retail product. Smaller values suggest that progeny will have a better lean to fat ratio.

Carcass weight (CW): Differences in pounds of hot carcass weight, adjusted to an industry standard age endpoint.

Ribeye area (REA): Differences in ribeye area in inches between the 12th and 13th rib. Greater ribeye areas are preferable.

Marbling (MB): Predicts the differences in the degree of marbling within the ribeye as expressed in marbling score units. Greater marbling numbers are preferable and are an indicator of higher carcass quality grades.

Fat (FT): Differences for fat thickness, in inches, for a carcass over the 12th rib. Smaller numbers of fat thickness are preferable as excess fat can be detrimental to yield grade.

Mainstream Terminal Index (\$MTI): Predicts genetic differences in profit per carcass by combining the potential for and value of post-weaning growth, quality grade and yield.

Owned with Linhart Limousin. Selling 20 exclusive semen packages. First come, first served. \$1,500 for 30 units. Semen will not be placed on the open market until spring of 2017.

Total outcross by the performance driven Red Angus sire LSF Saga 1040Y and the Hager Cattle Co. elite donor AHCC Dakota Luvly R595, who needs no introduction into the breed. She has produced seedstock bulls that are working in leading herds across North America, such as Ivy Livestock, Canada, Pinnacle View Limousin, Canada, Wiczorek Limousin, SD, Freed Livestock,

ll. Her sons have generated in excess of \$65,000 to date. As well, her sons have been members of every grand, reserve, or People's Choice pens that we have exhibited in Denver, since 2010. 5 flush mate brothers to Lot 1 sell. Here is a unique opportunity to invest in a highly predictable and proven cow family through these 5 sibs.

Lead bull in 2016 People's choice champion Lim-Flex pen.

AHCC Cowboy Kind 595C is just as his name implies, the kind that makes cowboys mouths water. He redefines stout, big boned, big footed, big topped and huge numerical growth. He ranks in the top 20% or better for WW, YW, MK, TM, CW and REA. He is square out through his hip and posses as much natural thickness and shape as you can put in one. From his center portion he is as soft and deep as you can make one, big bodied, bold ribbed, and easy fleshing. Not to mention, he is early maturing and recorded 40 cm testicles at 10.5 months of age. Here is a homozygous polled, performance oriented red Lim-Flex bull the breed has been waiting for. We plan on using him extensively in our program to ramp up our red Lim-Flex genetics. Don't miss this opportunity to invest in a true breed changer.

Lot 2. Member of 2016 People's Choice Champion Lim-Flex Pen.

Here is a homozygous, performance giant; 592C was the #1 weaning weight calves of the entire bull calf crop. He smashed the scales down with an actual weaning weight of 965 lbs., with a ratio of 114. He ranks in the top 25% or better for WW, YW, MK, TM, CW, and REA. If you're looking to add frame and extension to your next set of calves this guy fits the bill. Visually he is as long as a freight train, stands on a big foot, and packs as much hind quarter shape and expression as any purebred Limousin bull out there. For performance driven, predictable growth genetics don't miss this set of bulls out of the highly regarded Hager donor, AHCC 595R.

Lot 3. Member of 2016 People's Choice Champion Lim-Flex Pen.

AHCC 590C is the most moderate framed bull of his 5 flush mates, but still packs all the growth and power attributes that we breed cattle for. He posted an actual BW of 79 lbs. (ratio 95) and still pushed the scale down at 205-day wt. of 868 lbs. (ratio 103). This bull is very complete in his design, he is smooth shouldered, level topped, deep bodied, and transmits as much base width and shape as any bull in the offering. With a disposition that is second to none, he was the favorite bull of all the kids when we were halter breaking this set of Denver bulls. If overall completeness, disposition, and top notch proven genetics are a priority of yours, don't pass up AHCC Cowboy Saga C590

Lot 4. Alternate bull to the 2016 People's Choice Champion Lim-Flex Pen.

Here is another powerful red Lim-Flex that ranks in the upper 30% of the breed for 6 economically relevant traits: WW, YW, MK, TM, CW, REA. AHCC 591C is the type of bull seedstock breeders strive to produce, modest birth coupled with explosive growth. With an 83 lb. BW and a 834 lb. 205-day wt., this bull fits the bill. He is a complete, well-balanced bull with extra length of body, smooth shoulder, level top, and a big hip. If you're looking to add a bull from a proven cow family that adds a different genetic twist to your breeding program look for him March 28.

Lot 5. Lead bull in our black 2016 pen of Lim-Flex bulls.

AHCC 327C is a genetic masterpiece; he is as sound and complete as you can make one. He is smooth shouldered, long sided, bold ribbed, and thick from end to end. Numerically this bull covers nearly all the bases; he ranks in the top 1% of the breed for WW, 2% YW, 15% TM, 30% CEM, 20% SC, 2% CW, 10% MB, and 10% for MTI. Raised by a first calf heifer, he crushed the scale down at 881 lbs., with a ratio of 121. He was the #1 indexing bull out of the crop first calf heifers. We admire him for his shear mass, power, growth and numerical profile. We strongly believe in the value of this bull as a breeding piece and plan on using him heavily. Selling 2/3 interest, full possession.

Lot 6. Denver Bull.

Here is a really complete purebred bull that we displayed in Denver. He is sired by AHCC Anchor 838A, who was a high selling bull on our sale a couple of years ago, purchased by Lonely Valley Limousin in Nebraska. We really like this bull in terms of his shear mass and ruggedness. He is deep sided, easy fleshing, and thick from end to end. He is square out over his rump and stands on a good foot. On paper he is a nicely balanced bull from birth to growth and records actual performance of a 79 lbs. at birth to 864 lbs. at weaning. His dam, AHCC 042X, is a model purebred cow that traces back to the Westwind cow family. She is near perfect in terms of her udder design and teat placement, and brings in one of our top calves every year. If you're after time-tested genetics, don't pass him up sale day.

Lot 7. Member of our black Denver pen of Lim-Flex bulls.

Homo black and homo polled, raised by a first calf heifer. AHCC 383C is phenotypically complete; he is long in his skeletal design, smooth through his shoulder, deep middled, and easy fleshing. If you're after modest birth along with explosive growth, look no further. He recorded a 79 lb. BW along with an 808 lb. (ratio 111) WW. On paper he is equally impressive ranking in the top 20% CED, 5% WW, 4% YW, 10% CEM, 4%CW, 10% MB, and 10% \$MTI. With the likes of UnHeard of, Zodiac, and Winston in his pedigree, he should sire modest birth weights, good growth, and carcass traits that grade. If you're in need of a bull that is as complete visually as he is numerically, look for him sale day.

Lot 8. Member of our black Denver pen of Lim-Flex bulls.

One of the most complete bulls in the entire offering. AHCC 317C is a phenotypic standout. He long sided, smooth made, long and level hiped, stands on a good, big foot, and travels like a cat. His EPD profile ranks him in the to 25% or greater for BW, WW, YW, SC, CW, MB, and \$MTI. Raised by a first calf heifer AHCC 317A, which traces back to one of our most prominent cow families, he is sure to sire predictable genetics that withstand the test of time.

Lot 9. Denver prospect.

Here is a bull that was in our Denver prospect pen all fall and narrowly missed the ride to Denver due to his age. This bull is the type of bulls we strive to produce and visually he is my type of ideal breeding bulls. He is solid from end to end, ultra deep bodied, loose hided, soft made, deep flanked, and level out of his hip. From behind he possess as much natural thickness and mass as we desire. On paper you can't breed one much better. He ranks in the top of the breed for WW 15%, YW 5%, TM 30%, CEM 30%, CW 10%, MB 10%, and \$MTI 10%. His dam, AHCC 896U, is a model GAR Predestined cow with a near perfect udder. If you're looking to soften up a set of higher percentage cows, while keeping birth weight low, and growth and carcass traits high for cattle that will grade, this is a front pasture kind of bull. Selling 2/3 interest, full possession.

Homo black, homo polled. ET bull out AHCC 045X, who is a full sister to WestWind. 045C projects a nice balanced EPD spread from birth to yearling, along with an excellent scrotal EPD of 1.10. He also projects quality carcass traits for marbling, ranking in the upper 20% percentile and still maintaining positive REA EPD.

A 75% Lim-Flex by our now deceased herd sire Mag's UR A Robin. Here is a solid young individual with an abundance of natural thickness, muscle shape, and depth of center body, all combined into a very complete package. On paper he combines a very useful set of numbers, along with individual stats of a moderate 85 lb. BW and a respectable WW of 645 lbs. at a young age of 150 days. AHCC 064C is a solid ranchers bull, that will sire the kind of calves we all crave.

Another Unheard of x Responder mating that worked great. 074C is a low birth weight bull that recorded an actual BW of 70 lbs., and still pushed down the scale to 850 lbs. at weaning. Phenotypically he is equally impressive. He is a modest framed, deep made, bull with tremendous natural thickness and muscle shape. If you're in the market for a calving ease bull that should work on heifers while still maintaining above average growth look to AHCC 074C.

Here is a rancher's bull - visually he is stout. Extremely thick from end to end with plenty of muscle shape and mass through his center portion, he is a belly dragger. Bold shaped, soft made, and easy fleshing best describe this guy. On paper he also has it going on, modest for birth and explosive for growth traits. This is the same type and kind of Lim-Flex bull that we prefer to use on our commercial cows, to make commercial steers that the feed yards love to feed.

Performance minded ranchers take notice; AHCC 082C is a high percentage Limousin bull with power. He ranks in the upper 3% for WW, 4% for YW, 10% for MK, 2% for TM, 20% for CW, 3% for REA, and 2% for YG. On paper it is hard to make one read much better, plus he recorded a 205-day wt. of 808 lbs. (ratio 103). Visually he is stout in his design, really long spined, and deep from fore to rear. He stands on good substance of bone and a large, excellent shaped foot. Add some pounds to your next calf crop with this performance giant.

Sired by our new herd sire MAGS Ace, who has done a tremendous job of siring light birth weight, moderate made cattle, that are soft made, easy fleshing, loose hided, and still have plenty of natural thickness and muscle shape for the most discriminating cattleman. Lot 17 is one of the youngest calves on the sale. Don't over look him because of his age, he still recorded an actual WW of 575 lbs. at just 157 days of age, so he was too young to have an adjusted 205-day wt. He still has all the right pieces in the right places.

Phenotypically this is the kind of bull we strive to produce. He is massive in his shape, rugged in his design, and is backed with an EPD profile that ranks him in the upper echelon of the breed. This is exactly the type of bull I select for in our commercial operation. He ranks in the upper 35% or greater in the breed for 8 traits of economic relevance. AHCC 212C's dam is a model, young Westwind daughter that has weaned off two impressive calves back to back. Lot 25 pushed down the scale at 705 lbs., actual WW at 155 days of age.

This bull narrowly missed our cut of Denver pen bulls and he is a phenotypic standout - extremely correct made and sound traveling. He is chock full of natural performance and shape, couple that with spring of rib and easy fleshing ability. His dam, AHCC Miss Unheardof Z214, entered our donor pen last year along with his maternal grand dam, AHCC W916. Predictable genetics are what keeps us in the cattle business and this bull's pedigree is stacked with them.

Here is a solid breeding piece sired by CJSL 2238Z. Visually speaking, he exhibits added length of body, depth of rib, fleshing ability, and a long level hip. AHCC 216C stands on a good foundation of bone work and foot size. He displays a solid EPD profile from BW to YW, along with carcass numbers that will keep the feedlots eager to own your calves year after year.

Visually it is hard to fault this young bull, he is extremely soft made, deep sided and loose flanked. From behind, he transmits as much shape and natural thickness as any bull in the offering. He is clean fronted, smooth shouldered, and level topped. Numerically he is negative on BW and posts respectable growth numbers in the top half or better of the breed. His dam is an impressive young cow with a near perfect udder. Lot 28 has individual performance of 77 lbs. of BW and a 645 lb. WW at 159 days of age. His lineage traces back to the 116 cow family, which has been a part of HCC for nearly 20 years. Time tested genetics at its best, look for him sale day.

If you're in the market for a low birth weight, high maternal, high marbling, high \$MTI, red, polled bull, here he is. Maybe the deepest sided, softest made red bull in the entire offering. His young dam weaned him off at 615 lbs. at just 153 days of age (too young to adjust to 205-day WW). To soften up a set of higher percentage cows and add some quality grade, this bull should work great.

Here's another outstanding individual by CJSL 2238Z. This bull is really rugged in his design, super deep centered, and packs as much shape and natural thickness into a moderate framed package as any bull in the sale. His dam is a front pasture type of cow that has done a tremendous job on her first two calves and both have been featured bulls in our sales. AHCC 267C posted one of the heaviest 205-day weaning weights, smashing the scale down at 905 lbs. (ratio 115). If early pre-yearling growth is part of your breeding plans look for him.

7	3	86	123	32	4	1.1	24	47	0.82	-0.14	0.04	56.58

A 5/8 red Lim-Flex bull with power best describes this bull. He is thick made, deep through his center portion, and exhibits excellent natural thickness and hindquarter shape. On paper he is off the charts: WW 86 (1%), YW 123 (4%), MK 32 (15%), TM 71 (3%), and a huge REA EPD of 0.82 (10%). For a bull that covers all the growth bases on paper and reads just as good on individual performance of 84 lb. actual birth to 844 lb. weaning weight (ratio 108). This is the kind of bull that will keep commercial cattlemen in business.

Here's a tremendous purebred heifer bull prospect, out of a first time heifer. Lot 36 redefines the saying you can't have low birth weight, along with extreme growth, because you can and this bull proves it. His individual performance was even more exciting, 78 lb. actual BW and pushed the scale down at 822 lbs., making him the #1 weaning weight purebred bull out of the first calf heifers, (ratio 113). In person he is equally impressive, he is deep, soft centered, loose hided, long in his design and level from hooks to pins. Not to mention, he traces back to one of our most prolific cow families. Lot 36 has the look and attitude of a real breeding bull.

12	0.4	71	112	22	7	0.85	10	37	0.27	0.04	0.29	61.63

Out of a first calf heifer, a really nice, low birth weight bull by Zodiac. AHCC 341C recorded an actual birth weight of 73 lbs. and ties that into a CED EPD of 12. He also transmits tremendous growth numbers for a calving ease prospect, ranking in the upper 20 percentile or better for WW and YW. Visually speaking he is a stout featured, long made bull with added substance of bone and stands on a solid foot. For a light birth weight bull he recorded a nice 205-day weight of 734 lbs. If you're looking to add a low BW bull with solid growth, here he is.

Another caving ease prospect, out of a first calf heifer. AHCC 384C is moderate framed, finer in his bone work, smooth shouldered, and clean in his lines. Numerically he reads low birth as well: CED 10 (25%) and BW -0.2 (20%), and combines that with respectable growth numbers and excellent carcass numbers. He has individual performance of a 72 lb. BW and a 744 adj. 205-day weight. For a bull with low birth, adequate growth, and tremendous carcass traits, look for him sale day.

Here is a performance bull out of a first calf heifer. Lot 45 is a larger framed bull, which is stout in his bone shape and foot size. He has added length of body, is level out of his hip, and carries plenty of natural thickness and depth of body. On paper he is off the charts in terms of growth, marbling, and \$MTI ranking in the upper 5% of the breed. If you're after added growth, bone, and industry leading EPDs look to AHCC 386C.

Here's a mating that has worked for many years here at HCC, Unheard Of back on Lodestar cows. It has stood the test of time for solid, predictable, problem free cattle and 404C is no exception. He is a powerful bull in terms of depth, mass, and shape of body. He registered a 640 lb. actual weaning weight at just 155 days of age, from his 12-year-old dam. For a pedigree that has withstood the test of time, Lot 46 could add some longevity back to your cow herd.

Performance minded cattleman take notice, AHCC 444C is a royally bred performance bull. On paper he puts together chart topping growth numbers ranking in the upper 15% or greater in the breed, and has an REA EPD of 0.69 (20%). If muscle and growth are your main priorities, look to this fella sale day. Individual performance weights rank him among the best in his contemporary group; a modest BW of 88 lbs. and a scale popping 850 lb. adj. 205-day weight (ratio 110). This bull not only puts it all together on paper he is as impressive in person.

Lot 56 is a red, 50% Lim-Flex, flush mate brother to lots 1-4. Seedstock breeders take notice in this red bull, he could have very well made to trip to Denver (and probably should have). He is a very powerful individual just like his sibs, stout framed, good bone, excellent foot shape and quality, and combines that into a little softer deeper package than his flush mate brothers. Great EPD profile for growth and compliments that with outstanding phenotype, and backed by a cow family that is second to none.

Here's a tremendous high percentage Limousin bull by the performance powerhouse AHCC Red Xplosion. I really admire this bull for his sheer mass and power, from behind he exhibits an abundance of natural thickness, he is loose hided, deep flanked, and soggy centered, and packs all this into a moderate frame. His EPD profile is equally exceptional, ranking in the upper 15% for growth, 10% SC and CW. If you're looking to add some doability to a set of calves, in a red package, this may be the bull for you.

Nice young, red, Lim-Flex, from the mating of Unheard Of x Lodestar. Lot 61 projects a solid set of numbers all the way through and combines that with outstanding carcass EPDs and a \$MTI of 66.3, ranking him in the top 10% of the breed. He had an actual WW of 645 lbs. at just 158 days of age (too young to adj. to 205-day weight). Visually speaking he is a moderate made individual with tremendous natural thickness, shape and depth. If you're in need of a bull who can soften up a set of cow this may be your ticket.

Here's a powerful, 75% Lim-Flex in Lot 63. Numerically speaking he ranks in the top 20% or better for 10 industry relevant traits. He records low BW, high growth, and a big REA of 0.65. His individual performance is even more appealing, 83 lbs. BW and a scale smashing 885 lbs. at weaning (ratio 113). If you're in the market for a solid, reliable, performance driven breeding bull, look this guy up sale day.

Check out this 75% Lim-Flex breeding piece by MAGS Ur A Robin. AHCC 739C is a moderate made, meat wagon. He exhibits added muscle shape and an abundance of natural thickness into a sound, eye-appealing package. He recorded a moderate 87 lb. BW and a staggering 875 lb. adj. 205-day weight. If you're in search of a bull that will keep a little more muscle and shape into a set of calves this may be the bull for you.

Tremendous performance bull by AHCC Anchor. His EPD spread for growth is unequal, ranking in the top 2% and 3% for weaning and yearling weights, respectively. He combines that with a modest 86 lb. BW and a staggering 818 lb. adj. WW (ratio 105). Visually he is a rugged, soft centered bull with added natural thickness and doability. This is a bull who can pack on extra growth and performance to your next set of calves.

A 50% Lim-Flex by the popular growth and performance sire SAV Prosperity 9131. Lot 67's EPD profile ranks him in the top 25% of the breed for 6 economically viable traits. He recorded a modest birth weight and an outstanding 878 adj. WW (ratio 112). Phenotypically he is equally as impressive; he is extra long sided, level out through his rump, and carries down into a deep hind quarter, with plenty of natural shape to spare. If you're in search of cattle that grow and grade, look to AHCC 776 sale day.

Performance driven, high percentage Lim-Flex by AHCC Westwind. Here is a bull that posts excellent growth EPDs ranking in the upper 20% or better in the breed. Along with that he penciled in a 796 lb. WW (ratio 102). Phenotypically he is more impressive. He is stout in his feature, massive from behind in terms of natural thickness and muscle shape; he is bold sprung and soft centered, and early maturing. Visually he will turn the heads of the most astute cattleman that like performance packed, profit driven cattle.

A 50% Lim-Flex bull from our Lim-Flex donor dam, AHCC Miss Precision U838. Here is a bull that we really admire for his shear mass and depth of body. He is a true belly dragger, maybe the deepest bodied, boldest sprung bull in the entire offering. He boasts individual performance of a 79 lb. BW and a huge 827 lbs. at weaning (ratio 110). On paper he sports impressive numbers from calving ease, growth and carcass traits to rank in the upper 15% for REA, MB, and \$MTI. If a true combination bull is in your radar screen, look to lot 69.

Here's a 75% Lim-Flex bull out of a never miss cow that brings in one of our best year after year. AHCC 843U traces back to the same cow family as Westwind. If you're looking to add a higher percentage bull with added frame and growth, this may be the bull for you. He posts a solid set of growth and scrotal numbers, and a REA EPD of 0.93 (2%), which would him rank near the top of his pen mates.

Outstanding 50% Lim-Flex ET bull by MAGS Acapulco and an HCC elite Lim-Flex donor dam, AHCC Miss Precision U833. This bull is extra stout and offers a tremendous amount of natural thickness and muscle shape, plus he is deep throughout his center portion, exhibits early maturity and exceptional scrotal development. He is a carcass bull, if you're looking to add a carcass combination bull here he is; REA 0.71 (15%), MB 0.33 (15%) and \$MTI 63.28 (15%). Not to mention he recorded a light BW of 78 lbs. and a scale crunching 841 lb. weaning weight. This is a bull that can put you in the driver's seat and keep the feed yards coming back year after year.

Here is an outstanding Lim-Flex bull, out of a tremendous young Unheard Of daughter. AHCCY1947 is moderate in her stature, super deep bodied and easy doing, and her son AHCC 947C is no exception. He is a moderate made, powerhouse of a bull, who posses extreme natural thickness and muscle expression. He is ultra deep middle for as much muscle mass as he carries, and to top it off his EPD profile is second to very few, with his combination of modest birth, breed leading growth and maternal traits, along with a REA that made the Limousin breed famous.

Breeders pay attention here to a phenomenal bull on paper; he records an EPD profile near the top of the breed in nearly every industry relevant trait. At 205 days of age he hammered the scale down at 881 lbs., ranking him near the very top of his contemporary group with a ratio of 113. Visually speaking he is as long as a freight train, stout boned, big footed, with huge testicular development, and packs as much muscle shape and natural thickness into his skeletal design as any red bull selling. This cross of AHCC All In A595 back onto Unheard Of daughters is one that we have become very fond of in terms of the phenotype, power, and prediction.

Here's a 75% Lim-Flex bull with a tremendous EPD profile for growth, maternal, scrotal, and REA. If you're looking to add a higher percentage Lim-Flex to your genetic base, this would be a super nice bull to do it with. In person he is stout in his features, with added frame, substance of bone, foot size, and extension of body. His sire Ypsilanti has done an outstanding job of siring modest birth weight cattle, with added growth and power.

Moderation of frame, packed with added growth, fleshing ability, and breed leading numerical profile best describe this 50% Lim-Flex by Connelly Union. He is a bull I sure admire for his physical attributes: naturally thick, deep sided from fore to rear, and packs an abundance of shape into an eye appealing package. Lot 84 started off at a mere 76 lbs. (ratio 90) and commanded a respectable 792 lb. weaning weight (ratio 101). Be ring side sale day to invest in a truly unique combination bull in AHCC 990C.

Tremendous 2-year-old bull by SL Grand Slam, this guy is extremely appealing to the eye. He is stout, powerful, and sound. He possesses added depth, fleshing ability, and overall natural thickness and shape, all combined into a uniform package. As a yearling he ratioed 135 for IMF and was one of the highest indexing bulls for a purebred. If you're looking for an aged bull, with added doability, yet still maintains the Limousin thickness, look for lot 96 March 28.

Respectable EPD profile in this solid 75% Lim-Flex by Ur A Robin. He is a moderate framed bull with added extension of body, natural thickness, and muscle shape. Individually he recorded a light birth of 76 lbs. and came off at weaning at 610 lbs., at just 150 days of age (too young to adjust to 205-day weight). This is a bull that will add extra muscle shape, Limousin character, and visual appeal to a set of calves.

set of numbers for growth and maternal. Visually speaking he is as solid as they come - stout made, deep centered, easy fleshing, added natural thickness, and very complete and sound in his design. You could drive the wheels off your truck trying to find another two-year-old bull as complete, performance driven, and backed by a successful proven cow family.

NORTH AMERICAN LIMOUSIN FOUNDATION (NALF) SUGGESTED SALE TERMS & CONDITIONS

IDENTIFICATION OF ANIMALS: (1.) Each animal sold will have a readable tattoo corresponding to its registration paper. (2.) Seller agrees to check all tattoos for accuracy prior to the sale. The buyer has the responsibility for rechecking the tattoos after taking possession and reporting any discrepancies to the seller immediately. (3.) All animals to be sold will be identified by their official registration numbers, their tattoos and their registered names. If nicknames are used, they should be in addition to the other information. (4.) The NALF Board of Directors recommends that, when any animal is sold, there is complete disclosure of any retained genetics in the form of pregnant recipients, frozen embryos or frozen semen. (5.) The prefix in an animal's registration name cannot be removed or changed by subsequent owners. Owners other than the original applicant cannot add a two-, three- or four-letter prefix to the name of the animal unless it matches the prefix in the animal's tattoo.

REGISTRATION CERTIFICATES: (1.) The seller of the animal will submit the original registration certificate with transfer information or an application for registration with transfer information on it so that a certificate can be produced by NALF and transferred to the new buyer. The seller must sign the back of the certificate on the application to authorize the transfer. (2.) It is the responsibility of the seller to provide NALF with the buyer's complete name, address and membership number (if available) so the transfer can be completed. It is important that the membership number be given if the buyer is already a member of NALF. (3.) It is the seller's responsibility to provide the registration certificate or application and transfer information to NALF within 60 days following the date of sale and pay transfer and registration fees.

TERMS: Terms of all sales are considered to be cash unless credit arrangements have been made prior to the sale between the buyer and the seller.

HEALTH: (1.) On all animals sold, health tests will be announced at the sale or printed in the sale catalog. It is understood that health papers reflect the condition of the animal at the time of the sale, but carry no further guarantee as to the future health of the animal. (2.) Buyers having special health requests or who wish to take cattle into states with specific and rigid health regulations should inquire specifically about the health tests required for entry into their state prior to the sale. (3.) All females sold are considered to be calfhood vaccinated for brucellosis, unless they are otherwise stated in the catalog or announced from the block. It is suggested that verification of vaccination be written on the health certificate.

PURCHASER'S RISK: (1.) Each animal becomes the risk of the purchaser as soon as it is sold. (2.) It is the responsibility of the buyers to see that their purchases are fed and cared for following the sale. (3.) It is the responsibility of the buyers to arrange all trucking for their purchases.

ANNOUNCEMENTS: (1.) Any change from the information that is printed in the catalog will be announced from the auction block. (2.) All announcements made from the auction block take precedence over the printed catalog. (3.) Cataloged lots not selling will be announced prior to the sale or printed on a current supplement sheet.

BREEDING GUARANTEE: (1.) All animals are guaranteed to be breeders with the exception of (a) calves under 12 months of age; (b) in the event of any injury or disease that occurs to the calf after sale; (c) gross negligence or willful misconduct on the part of the purchaser; or (d) females used in embryo transplant/transfer (ET). (2.) A lactating cow with calf at side, sold as one unit, is a proven breeder, as indicated by the calf at side. (3.) Bulls are guaranteed to be breeders at the time of sale or at 14 months of age if they are younger than 14 months at time of sale. Any bull that either settles cows by natural service or passes a fertility test made by a competent veterinarian is considered fertile. Any guarantee with respect to the ability to freeze semen shall be a separate agreement between buyer and seller. (4.) Females sold as safe-in-calf have been examined by a competent veterinarian or other reproductive technician and are so guaranteed to be with calf. It is the buyer's responsibility to pregnancy-check all females and report any discrepancies within 30 days following the sale. (5.) Any guarantee with respect to ET production shall be a separate agreement between buyer and seller.

OPTIONS AND PRIVILEGES OF RETURN OR ADJUSTMENT: (1.) All claims for adjustments or refunds must be made in writing either within six months of the date of the sale or no later than six months after the animal reaches 18 months of age, whichever occurs later. (2.) In the event that an animal is claimed to be a non-breeder, the animal must be returned to the farm of the seller in good condition and must have met the health requirements of the original seller's state. The seller shall be entitled to six-month trial following the return of the animal in which to prove that the animal is a breeder. If, at the end of six months, the seller has been unable to prove the animal as a breeder, the seller shall, at the option of the buyer, replace the animal with another of equal value or refund the total purchase price. The return of the purchase price shall in all cases be deemed as full settlement. (3.) Any expense incurred in transporting the animal that is claimed to be a non-breeder shall be the responsibility of the purchaser except that the seller shall be responsible for transportation costs in the excess of the distance between the purchaser's farm and the location of the sale. If the seller proves the animal to be a breeder, it shall be the obligation of the purchaser to take delivery of the animal and pay all expenses incurred for

transportation. (4.) It is the obligation of the buyer and seller to negotiate any settlements on cattle that have not been properly represented at a sale. The selling of an animal constitutes a contract between buyer and seller, and it is not the responsibility nor the right of NALF or of the sale-management firm to settle disagreements between buyers and sellers of cattle that have not been properly represented. The return of an animal at the expense of the purchaser with a refund of the purchase price made by the seller is in all cases considered a complete settlement. Other settlements, which are negotiated between buyer and seller, may be equitable to cover instances in which cattle are not as represented sale day, but that does not warrant complete return of the animal.

BLOOD-TYPING FOR PARENTAGE VERIFICATION: (1.) If, at some time, the purchaser raises a question as to the accurate parentage of an animal he has purchased, it may be settled by blood-typing. Blood samples will be taken by a licensed veterinarian of the animal in question and of its sire and dam if they are not currently on file. The verification of the parentage test will be made by NALF's approved laboratory (MMI Genomics). The results of these tests will be sent directly to NALF and will be sent on to both the purchaser and the seller so they will be aware of the official results. (2.) If the blood tests indicate that the animal is not as it was registered originally, the seller will reimburse the buyer for the test and will refund the total purchase price of the animal or replace the animal with another of equal quality and value as determined by the purchaser. (3.) It is important to remember that blood-typing is not 100 percent exclusive and that it simply identifies animals that will qualify as the parents or animals that cannot be the parents. (4.) All bulls born after December 31, 1990, that are to be used for artificial insemination (AI) must be parent-verified by blood-typing (both the sire and dam). All females born after July 1, 1987, that are to be used for AI must be sire-verified through blood-typing. All females born prior to July 1, 1987, that are to be used for ET and all bulls born prior to July 1, 1987, that are to be used for AI must have an identification blood type on file.

HORNED/SCURRED/POLLED DEFINITIONS: (1.) HORNED. An animal with a horn growth affixed to the skull that has or has not been removed. (2.) POLLED/SCURRED. An animal with rudimentary horn growth that will not develop into a horn. The rudimentary horn growth may or may not become affixed to the skull at an older age. (3.) POLLED. An animal with absence of horn growth. (An animal can have scurs and still be genetically polled.) (4.) SMOOTH POLLED. A smooth-polled individual has no scurs and does not develop scurs later in life.

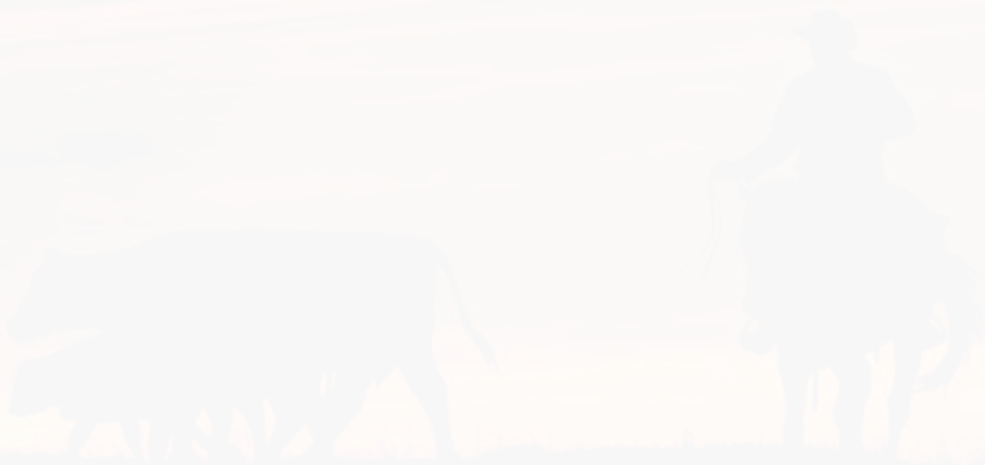

GUARANTEES: (1.) If an animal is sold as polled or polled/scurred and proves to be horned, the seller shall be obligated to refund the purchase price upon return of the animal to the farm of the seller at the expense of the seller or may be exchanged for a polled animal of equal value, whichever is acceptable to the buyer. The buyer has 30 days from date of sale to notify the seller that an adjustment is in order. (2.) If an animal is sold as smooth-polled and proves to be scurred, the seller shall be obligated to refund the price upon return of the animal to the farm of the seller at the expense of the seller or, at the buyer's option, shall be exchanged for a smooth-polled animal of equal value. (3.) If an animal is sold as polled and develops scurs, the seller will not be obligated to make any adjustment because a scurred animal is considered polled. (4.) If an animal is sold as polled and has scurs, it shall be announced at the time of sale that the animal has scurs. If it is not announced and the buyer finds before the animal leaves the sale premises that the animal has scurs, the buyer must notify the seller of the findings. The seller shall then be obligated to refund the purchase price.

DISCLOSURE OF RETAINED GENETICS: Because the sale of a registered Limousin animal constitutes the transfer of ownership of all, or a portion of, a "genetic package," it is the seller's responsibility to inform potential buyers of all retained genetics of animals in circumstances where potential exists for buyers to be misled. This includes, but is not limited to, semen collected and frozen prior to sale, embryos flushed, existing clones as either live animals or embryos, and cows carrying the service of an offered bull.

DISCLOSURE OF TESTS RESULTS FOR KNOWN GENETIC DEFECTS AND FACTORS: (1.) The seller shall have an affirmative duty to notify the buyer of any test results for genetic defects or genetic factors not otherwise reflected on an animal's pedigree. (2.) Nothing contained herein should be construed to relieve the parties from complying fully with the rules and policies of NALF relating to genetic defects generally or individually.

LIMITATIONS OF OBLIGATIONS: (1.) If these suggested terms and conditions are adopted, they should constitute a contract between the buyer and seller for each animal sold under these terms, as such; and it should be binding upon both parties. Animals resold following purchase in a sale shall constitute a separate transaction, and the privileges and obligations of the original two parties connected thereto are not covered by the terms and conditions of sale. (2.) NALF, its directors and employees are not in any way responsible or liable for enforcing the suggested terms and conditions of any agreement involving transactions between buyers and sellers.
