Find us on

Dear Cattle Producers,

Welcome to the 20th Annual Hager Cattle Company Lim-Flex Bull Sale! As we prepare for sale day this April at the ranch, we are both grateful and excited — grateful for the customers and friends who have

supported us over the past two decades, and excited about the strength and optimism in today's cattle industry.

We have witnessed record-setting feeder cattle, fed cattle, and cull cow prices throughout this winter. With the nation's cow herd at historically low numbers and increasing talk of heifer retention across the country, the decisions made now will shape operations for years to come. There has never been a better time to upgrade your bull genetics.

For 20 years, our focus has remained steady: to breed cattle that combine modest birth weights with explosive growth and above-average carcass traits. We believe this year's set of bulls ranks among the best we have ever offered. They are built to add pounds, improve carcass value, and enhance maternal strength — all while maintaining the structural integrity and longevity you expect from Hager genetics.

With more heifers being retained nationwide, we are especially proud of our outstanding selection of calving-ease bulls this year. These bulls are designed to give you confidence during calving season without sacrificing performance and profitability down the road.

We are also pleased to once again offer our commercial Lim-Flex replacement heifers — females bred for maternal strength, longevity, and productivity that represent the foundation of our program.

As you study this year's catalog, we invite you to imagine the impact these cattle can have on your operation. We appreciate your trust over the past 20 years and look forward to welcoming you to the ranch on sale day.

~Austin, Leah, Bailee, Pitch, Tripp, and Remmi Hager

We do not wish to clutter your mailbox; to be removed from our mailing list please email your name and address to hagercc@srt.com.

Celebrating our 20th Annual **LIM-FLEX BULL SALE** TUESDAY, APRIL 7TH

At the Ranch: 4651 2nd Ave NE, Karlsruhe, ND

Videos and online bidding at bid.superiorlivestock.com

ONLINE BIDDING:

Go to Bid.SuperiorLivestock.com for Superior's new online bidding platform. If you have not registered there before you will need to create an account. The first time you register an account you will receive a confirmation e-mail that you must click on. Once you have completed this, select the auction you would like to bid on and click the "Request a Buyer Number" button. The first time you request a buyer number you will be sent a confirmation code via text. Enter that code in the login portal and you will receive a buyer number. This 2-step verification process will only have to be done once and in the future you will be able to simply login and request a buyer number and receive it instantly for any auction. Once you have successfully registered and received a buyer number it will show your name and buyer number on both the video preview page and the online bidding page when you are logged in. If you have an account at LiveAuctions.tv you may skip the registration process and use those login credentials to request a buyer number as LiveAuctions is a division of Superior Livestock. For more details on registering an account and also how to bid, you may watch a tutorial at Bid.SuperiorLivestock.com/how-it-works.

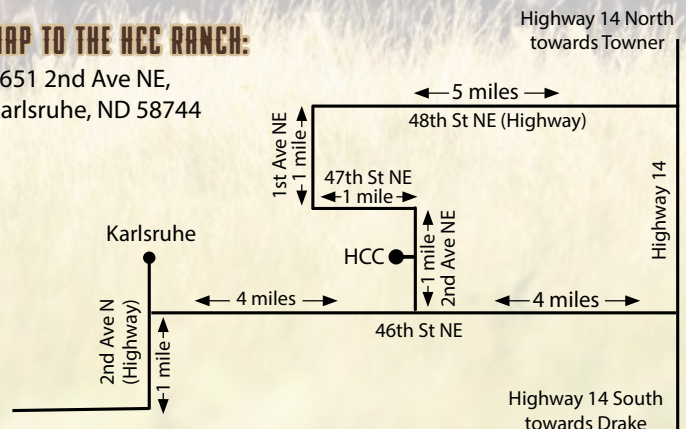

TURN IN BIDS OVER THE PHONE:

This is Superior's traditional method of buying cattle and is the suggested process for anybody who does not have consistent, high-speed internet. You still must register an account at Bid.SuperiorLivestock.com and request a buyer number. Once you receive a buyer number you will see the bid line phone number. Just watch the auction online and call in at least 2 lots ahead of the lot you are looking to bid on. A Superior Livestock representative will be with you on the phone and will assist you in placing bids.

FOR HELP WITH REGISTRATION OR ANY PART OF THE BIDDING PROCESS PLEASE CALL MARIAH AT (712) 294-4731.

MAP TO THE HCC RANCH:

• Cobblestone Inn and Suites, 402 US-2, Rugby, ND, 701-881-3000

EPDS AND ADDITIONAL DATA:

All EPDs have been provided by the North American Limousin Foundation and were pulled on February 26, 2026. NALF updates EPDs on a weekly basis, which may cause minor changes to the EPDs presented in this catalog. Scrotal measurements and ultrasound data will be available by April 1. Hager Cattle Company is a member of LIMS.

ANNOUNCEMENTS:

Announcements made sale day will take precedence over printed material in catalog.

TRANSPORTATION:

Bulls: Free delivery in North Dakota and surrounding states on purchases of **\$5,000 or greater**. Delivery beyond will be done in the most cost efficient manner possible.

Heifers: Buyers of the replacement heifers are responsible for their own transportation. We will assist in lining up delivery when possible, however the costs of delivery is the buyers' expense.

GUARANTEE:

The breeding period is defined as 90 days following the first turn out. Hager Cattle Company guarantees purchases selling for \$5,000 or more at a value of 100% credit, less current salvage market value, toward the purchase of one bull in the following year's bull sale. If the new purchase costs less than the credit amount, no further credit is due. One purchase credit cannot

be used on multiple bulls (1 for 1 only). In the event of death or injury, please contact us as soon as possible. If a replacement bull is needed to help you through the breeding season, we will provide one if one is available.

TERMS:

Terms of the sale are cash unless prior credit arrangements are made between buyer and seller. Settlements are to be made immediately after the conclusion of the auction. All cattle sell under the recommended terms and conditions of the North American Limousin Foundation. You may request a copy of those terms from Austin Hager or the sale consultants, or go to www.NALF.org to view online.

HEALTH:

Inforce 3, Bovi-Sheild Gold 5, One Shot, 7 Way, Sommus, Endovac, Valcore Injectable, Clean-Up. Johnes tested cattle herd since 2012; all bulls selling are from a negative tested dam. Herd health: Dr. Kristie Best - 701-537-0502.

INSURANCE:

As soon as an animal is purchased, it becomes the responsibility of the buyer. We do recommend buying insurance sale day as we will not be responsible for sickness or injury after sale day. **Brett Schaefer - Heritage Insurance Services (701) 818-0806.**

SEMEN:

If you are interested in purchasing semen on any Hager Cattle Company sires, contact Austin Hager.

ABSENTEE BIDS:

Mailed or telephone bids will be handled in the most confidential manner. If you are unable to be present to place your bids, please feel free to contact Hager Cattle Company. Individuals will be available on site to handle absentee bids and we would ask that you contact Austin Hager prior to the sale so we can be sure to accommodate your needs.

If you are purchasing online or by phone, we will email an invoice to the email address used for your bidder registration or the email we have on file for you. We kindly ask that payment be mailed immediately to: Hager Cattle Company.

VOLUME PURCHASES:

Buy 5 or more bulls and receive a 5% discount. Buy 10 or more bulls and receive a 10% discount. \$75 credit per bull if buyer hauls home **SALE DAY**. No volume discounts or hauling credits for the heifers.

LIABILITY:

Each animal will be the buyer's risk as soon as sold, but will be cared for by the seller for a reasonable period of time. Every precaution will be taken for the welfare of the cattle sold. Neither owner nor sales management can be responsible for accidents, but every effort will be made to provide for the safety and comfort of those attending the sale.

CATALOG DESIGN BY:

Jennifer Scharpe, 605-280-0795

Lot 1 - If you want to raise the ceiling of your cattle operation, start here. AHCC Landshark 162N brings power, performance, and profitability to the table. He delivers explosive, big time growth with the kind of performance that dominates every contemporary. His light ACT BW of 70 lbs (84 Ratio) started him off and then exploded to an ADJ WW of 784 lbs (116 Ratio). He didn't stop there and continued to excel to an ADJ YW of 1349 lbs. His carcass profile is loaded from top to bottom, built to win on the grid and drive serious dollars. Big MB, CW, REA, and FT numbers push the bar to the top 35% or greater of the breed. Not only does he excel on paper, but his phenotype is just as impressive. A powerful, wide-based bull that combines exceptional depth of body with a bold rib shape and expressive muscle from end to end. He stands on a sound structure with a level top and stout hip, offering the kind of dimension, balance, and structural integrity that will translate into practical performance in the pasture. Don't pass up this true program changer with the power, pedigree, and carcass muscle to make an immediate and lasting impact in your herd. **Selling 2/3 semen interest and full possession.**

Lot 2 - This Landshark son doesn't live in the shadow of the lead, he demands attention. AHCC 916N was the lead bull of our Reserve Champion and People's Choice Lim-Flex pen at the 2026 NWSS. From birth-to-yearling, he posts elite gains. His ACT BW of 87 lbs (102 Ratio), ADJ WW of 802 lbs (121 Ratio), and ADJ YW of 1407 lbs (102 Ratio) lands him in the top 15% of the breed for growth. He takes it another step with breed-leading maternal power, ranking in the top 1% for MK and 2% for TM. His carcass profile is equally impressive with CW, REA, FT, and YG all in the upper 25% or greater rankings. Lot 2 is a powerful, three-dimensional bull that blends body depth and rib shape with true width and substance from behind. He carries himself with presence and balance, offering the kind of mass, muscle expression, and herd bull look that sets the tone early in a sale. Find this true headliner herd sire with the growth, maternal dominance, and carcass strength to stand at the front of any operation. **Selling 2/3 semen interest and full possession.**

Lot 3 - The next member of our NWSS 2026 Reserve Champion and People's Choice Lim-Flex pen is AHCC Landshark 794N. Lot 3 is a true standout herd bull prospect – big centered, stout made, and loaded with shape from end to end. He combines a bold rib cage and deep body with a wide top and powerful hip, all wrapped in a smooth, balanced package that gives him a commanding presence and the kind of natural dimension cattlemen appreciate when they're serious about adding pounds and performance. This Lim-Flex bull flat gets after it from weaning to yearling, stacking on the pounds and separating himself with real-world performance. He posts an ADJ WW of 867 lbs and climbs to an ADJ YW of 1417 lbs. He brings elite maternal firepower, ranking in the top 1% of the breed for both milk and total maternal, setting the stage for productive, high-output daughters. Then he seals the deal with a big-time carcass profile, packing MB, REA, CW, and FT EPDs where grid premiums are earned. Lot 3 is a true breeding piece that adds depth, direction, and predictability to a program. Bid with confidence on him sale day.

Lot 4 - Rounding out our widely successful Lim-Flex pen in Denver is AHCC Landshark 8001N. He brings serious power and performance to the table. He smashed the scales at weaning time with an ADJ WW of 788 lbs (115 Ratio) and carried that momentum straight through yearling with an ADJ YW of 1433 lbs (101 Ratio). This is what landed his growth EPD profile in the top 2-3% of the breed. His maternal traits are equally impressive with TM and MK in the top 3% and greater in rankings. He finishes with a complete carcass package, adding MB, FT, and CW where premiums are earned. His appeal doesn't stop at the papers. An elite herd sire prospect that excels in length of body and extension, offering added stretch from shoulder through his hip while maintaining depth and mass. He ties in clean through his front third with a smooth shoulder and refined head and neck, giving him a sharp, herd bull look that blends power with balance and eye appeal. Be sure to find Lot 4 who blends explosive growth, dominant maternal genetics, and real carcass value into one powerful package.

02/18/2023 • PERCENTAGE(93/83.3) • Sire of Lots 5-10, 13-17, 75, 80, and 94

WZRK Liberty Bell 9040L is a purebred Limousin sire from the respected Wieczorek program, sired by CELL History Buff 0245H ET and backed by a productive WZRK female. He combines muscle expression, depth of rib, growth, and strong breed character in a balanced, eye-appealing package.

Hager Cattle Company purchased Liberty Bell in the 2024 Wieczorek Limousin Bull Sale to add a powerful shot of purebred Limousin genetics to our herd. His influence is evident in this offering, with 14 lots in the sale sired by Liberty Bell.

How about a high percentage Lim-Flex bull that is built to add power and performance? He delivers explosive growth, pushing the scale down early at weaning time. He weighed in with an ADJ WW of 816 lbs (119 Ratio). His maternal EPD spread is equally impressive, offering the balance needed to produce productive, long-lasting daughters. Add in a strong carcass EPD profile and you have a complete powerhouse package you will want in your pastures.

We are really liking the Landmark sons in our sale line up. This 5/8 Lim-Flex really shot up by weaning time with an ADJ WW of 739 lbs (111 Ratio). His maternal package is the kind you want to see, high milk, high growth, and high total maternal. Put that together with a set of carcass numbers in the top 10% or better of the breed and you have a powerhouse sire prospect.

LOT 19

CUSTOMER APPRECIATION AWARD - 2025

Dean Klapperich | Wasta, South Dakota

Dean Klapperich began his journey with Limousin cattle in 1988 alongside his wife, Donna, and the Bies family near Rapid City, South Dakota. After Donna's passing in 2014, the family continued building their operation, relocating to Wasta in 2018 and summering cattle in the Black Hills. Today, it remains a true family ranch, with Dean's children — Hannah and her husband Justin, Taylor and his wife Katelyn — and six grandchildren all part of the legacy.

The Klapperich Ranch has supported Hager Cattle Company since the early days of our production sales, purchasing their first two HCC bulls in 2008 on a spur-of-the-moment stop while visiting family in Bismarck. What keeps Dean coming back is the feed efficiency, solid growth, and hybrid vigor of the Lim-Flex cross. Retaining 80–100 Lim-Flex heifers each year, the Klapperich family values structural soundness, longevity, disposition, and performance — traits they consistently find in HCC genetics. We are deeply grateful for Dean's loyalty and the many herd bull purchases over the years, and we look forward to continuing this partnership for years to come.

Here's a high percentage Lim-Flex out of a first calf heifer, coming light with ACT BW of 78 lbs for that calving confidence. Big CEM and ST numbers stack the odds in favor of daughters that last. Notable GEST, CED, and MK keep the cow herd functionable and efficient. Added marbling ensures calves don't just grow, they can also grade.

LOT 33

Reference Sire + COLE JACKPOT 38J ET

02/15/2021 • LIMOUSIN(81/70.3) • Sire of Lots 34-48, 86, 89, 95

COLE Jackpot 38J ET has proven himself as one of the most influential sires in the offering, combining elite maternal strength with added carcass merit. He excels for weaning weight, milk, total maternal, and docility—traits that translate into productive, easy-managing daughters and heavy, uniform calf crops.

With added carcass value to complement his maternal advantages, Jackpot offers a balanced genetic package built for long-term profitability. His impact is clear in this year's sale, where he leads one of the largest sire groups with 18 sons featured in the offering.

Here is a Jackpot son that gained steam from weaning to yearling, stacking on pounds and showing a strong growth curve. He put out an ADJ WW of 739 lbs (111 Ratio) and grew to an ADJYW of 1194 lbs (101 Ratio). His impressive maternal EPD package comes with MK, TM, SC, ST, and DOC in the upper 25% or better in the breed, making him a solid option for building productive, easy-managing cows. He finishes with added CW and MB to keep calves profitable come sale day.

Here is a Landshark sired son that pushes the scale every step of the way. His ADJ WW of 801 lbs (117 Ratio) and ADJ YW of 1237 lbs (102 Ratio) push this Lim-Flex bull's growth EPD profile into the top 25% or better of the breed. He pairs that performance with a carcass profile stacked with top notch numbers and equally strong index values. Be sure to circle this growth-driven, commercial bull built to add scale weight and deliver value all the way to the grid.

Low birth and solid gains are the name of the game. This Kingpin son fell to the ground with an ACT BW or 75 lbs (92 Ratio) and climbed to an ADJ WW or 764 lbs (112 Ratio). Combine that with an impressive maternal profile and you will find yourself with a cow-making breeding bull. He rounds out the total package with his EPDs for \$TPI, CW, REA, and MB hitting the upper 35% or greater of the breed.

Good cows make good bulls. Find a herd sire with growth and maternal traits in the upper 25% or greater of the breed, then pack in some steady growth and you have a sire that is going to keep more replacement heifers in the pen. Top that off with excellent YG, FT, and REA and you have a well-made, ready to work her sire bringing more profit to the table.

Out of a first calf heifer with a modest ACT BW of 80 lbs offers that desirable calving confidence. He turned in solid performance at weaning with an ADJ WW of 720 lbs (112 ratio). This Skynard son brings an attractive maternal and growth package with many EPDs ranking in the top 25% or better of the breed. Added MB and CW help ensure the calves are competitive when they hit the scale and the rail.

Take a look at this Federal Reserve son – he puts together a complete maternal package. Light at birth with an ACT BW of 76 lbs (90 Ratio) make him a perfect candidate for heifers. His strong maternal profile is complemented by added marbling, giving his calves the ability to not only perform in the pasture but also earn premiums on the rail.

Lot 97 + 60 COMMERCIAL LIM-FLEX REPLACEMENT HEIFERS

We are continuing to offer our commercial Lim-Flex replacement heifers. These are 60 top-cut open heifers from our commercial cow herd. These quality heifers have become a sale highlight. They are May born commercial Lim-Flex heifers. The heifers have been Bangs vaccinated and have also had Preg-Guard 10 shots. They will be weighing approximately 800 lbs. This is an excellent set of heifers that will sell gate cut in groups of 5. High bidder has the opportunity to roll the pen and take all of the heifers.

USING LIMOUSIN & LIM-FLEX EPDS TO AID SELECTION

Expected Progeny Differences (EPDs) are used to compare the genetic merit of cattle for specific traits, and can aid in making selection decisions for desired traits in the herd. An EPD helps to predict the difference in performance of the future offspring of a parent. They are based on data from the animal's pedigree, performance, and performance of its relatives and offspring. It is important to remember that the performance of an animal is determined both by genetics and environment, and EPDs help to predict differences due to genes passed from parents to offspring. When additional DNA information is available (testing through a 100K panel), accuracy of EPDs is improved. By combining performance, progeny data, as well as pedigree and genomic results, we can best estimate an animal's genetic value as a parent.

Another fundamental concept of interpreting EPDs is to recognize that EPDs serve to rank animals. By comparing an animal's EPD for a given trait to the average EPD of all animals, one can determine if the animal is above or below average. By familiarizing yourself with percentile rankings, you can determine the degree to which an animal is above or below average for a given trait.

Calving Ease Direct (CED): Percent of unassisted births of a bull's calves when he is used on heifers. A higher number is favorable, meaning greater calving ease.

Birth weight (BW): Predicts the difference, in pounds, for birth weight of the calf.

Weaning weight (WW): Predicts the difference, in pounds, for weaning weight (adjusted to age of dam and a standard 205 day age). This is an indicator of growth from birth to weaning.

Yearling weight (YW): Predicts the expected difference, in pounds, for yearling weight (adjusted to a standard 365 day age). This is an indicator of growth from birth to yearling.

Milk (MK): The genetic ability of a sire's daughters to produce milk, expressed in pounds of weaning weight.

Total maternal (TM): An index, combining growth and milk information as a predictor of weaning weight performance of calves from a sire's daughters. A greater TM value means a mother that returns comparatively higher weaning weights on her calves. $TM = MK + 1/2WW$ EPD.

Scrotal Circumference (SC): SC is a good indicator of age at puberty in a bull's daughters. EPDs for scrotal circumference are indicated in centimeters, with higher values indicating genes for larger yearling SC for sons and earlier puberty of daughters.

Stayability (ST): Predicts the genetic difference, in terms of percent probability, that a bull's daughter's will stay productive in the herd to at least six years of age. The stayability EPD is one of the best measures currently available to compare a bull's ability to produce females with reproductive longevity.

Docility (DOC): Predicts genetic differences in the probability that offspring are scored a 1 (docile) or 2 (restless) as opposed to 3, 4, 5, or 6 (nervous

to very aggressive). Higher EPD values for docility represent genetics for calmer behavior.

Yield grade (YG): Differences in yield grade score, which is a predictor of percent retail product. Smaller values suggest that progeny will have a better lean to fat ratio.

Carcass weight (CW): Differences in pounds of hot carcass weight, adjusted to an industry standard endpoint.

Ribeye area (REA): Differences in ribeye area in inches, measured between the 12th and 13th rib. Greater ribeye areas are preferable.

Marbling (MB): Predicts the differences in the degree of intramuscular fat within the ribeye, expressed as marbling score units. Greater marbling numbers indicate higher carcass quality grades

\$TPI: Terminal Profit Index, constructed to identify terminal sires that produce the highest profit potential fed cattle. The index is reported in dollars and represents expected differences in profit per mating. \$TPI places positive economic weight on post-weaning gain. Dry matter intake is also included, and combined traits explain differences in feed conversion. The parameters of this index include the most recent 10 years of reported fed cattle and grid pricing, Kansas State University reported feedlot cattle performance, and NALF production data.

\$G: Dollar gain is an index to reflect an animal's feed conversion capability, and identify animals that are superior in feed efficiency.

\$MPI: In this production scenario, Limousin bulls are mated to Angus-based cows with replacement heifers retained from the calf crop and surplus calves marketed at weaning. EPDs weighted in this index are Calving Ease Direct and Maternal, Weaning Weight, Milk, Mature Weight, Dry Matter Intake, and Stayability. Mature weight is the primary driver and represents the significant cost of maintenance energy requirement in the cow-calf sector. Weaning Weight and Milk (expressed in pounds of calf weaning weight) represent the principal revenue stream. Stayability helps account for differences in replacement costs in the system and the effect of heifer retention on revenue streams. This index should be used by commercial cattlemen whose production scenario includes marketing calves at weaning and retaining replacements from the herd.

\$IPI: The production scenario for \$IPI includes mating Limousin sires to Angus-based cows with retention of replacements from the herd and all other calves fed out and marketed on a value-based grid that rewards quality and yield. IPI balances both maternal and terminal selection criteria by combining replacement female retention from the herd with carcass endpoint for marketed surplus heifers and all steers. Due to the challenges faced by commercial cattlemen in this production scenario, \$IPI incorporates the largest and most diverse set of EPDs, including carcass traits as the primary revenue drivers, along with cow Mature Weight, Stayability, and Dry Matter Intake as cost drivers.
